

NAME:

# CITY OF THE FUTURE!

What will the world look like in the future? It hasn't happened yet, but it will definitely be designed by people who are young right now!!

FIRST, name your town. It can be a totally made up name!

THEN, think about the landscape of the town: are there mountains, forests, rivers? What buildings are there? What things do people need to live?

Decide on a symbol to represent each thing and put it in the Map Key. Next, you can draw in all the features of your town on your map!

Think of some of the cool technology there might be in the future! Will there be a new way to get around town? What will things look like?
